

Catch::TestCaseInfo

```
classDiagram
    class Catch_TestCaseInfo["Catch::TestCaseInfo"]
    class Catch_TestCase["Catch::TestCase"]
    Catch_TestCase --|> Catch_TestCaseInfo
```

The diagram illustrates an inheritance relationship between two classes. The base class, `Catch::TestCaseInfo`, is represented by a gray rectangular box at the top. The derived class, `Catch::TestCase`, is represented by a white rectangular box at the bottom. A solid blue arrow points vertically from the top of the `Catch::TestCase` box to the bottom of the `Catch::TestCaseInfo` box, indicating that `Catch::TestCase` inherits from `Catch::TestCaseInfo`.

Catch::TestCase
